

SKILLS & TECHNOLOGIES

- **Programming Languages:** JavaScript, TypeScript, Kotlin, Python, SQL, Ruby, C#
- **Front-End:** React, Next.js, Redux, Tailwind CSS, Kotlin/JS, Kotlin React Wrapper
- **Back-End:** Node.js, Express.js, Spring Boot, Ruby on Rails, .NET
- **DB & Data Engineering:** PostgreSQL, MongoDB, Azure (ADLS, ADF, ASA), ETL/ELT Testing, Dimensional Modeling, Medallion Arch.
- **Cloud & DevOps:** Azure, AWS, Docker, Jenkins, Gradle, Azure DevOps, AWS CodePipeline
- **Developer & Design Tools:** Git, Postman, Insomnia, Figma, Draw.io, Chrome DevTools
- **Methodologies:** Agile, Scrum, Automated Testing, QA Methodologies

SOFTWARE ENGINEERING EXPERIENCE

TorahAnytime	
Full Stack Software Engineer	Jan. 2025 – Present
● Developed key user-facing features, including video playback, filtered search, and content downloads, with React and Next.js to improve content accessibility and boost user engagement. ● Optimized video metadata retrieval by developing and deploying cached RESTful APIs, reducing latency by 30% ● Ensured API reliability and data integrity via Swagger documentation, automated testing, and data profiling. ● Reduced content update time for non-technical staff by 20% in the first quarter of 2025 by developing a comprehensive admin panel. ● Developed a responsive, mobile-first UI with Tailwind CSS, guaranteeing cross-device consistency through rigorous QA testing. ● Managed sprint tasks in Jira and utilized Git for version control, ensuring timely feature deployment in an Agile/Scrum environment.	
Self Employed	
Independent Consultant	Apr. 2024 – Jan. 2025
● Designed and developed three commercial websites using HTML, JavaScript, and Tailwind CSS, increasing client visibility by 20%. ● Boosted search rankings and organic traffic through SEO strategies that improved PageSpeed scores by 30% and cut load times by 40%. ● Engineered a FastAPI appointment system and Twilio-based A2P messaging solution to automate business processes. ● Ensured system reliability and high client satisfaction by consistently meeting a 24-hour SLA for all change requests and tech support.	
Ecosave	
Full Stack Software Engineer	Oct. 2022 – Apr. 2024
● Engineered a client-facing sustainability portal using Kotlin/JS and React, enabling enterprise clients to track energy KPIs and manage over 5,000 data points monthly. ● Automated the generation of GRI-compliant sustainability reports using JasperReports and Kotlin, saving an estimated 20 hours of manual work per reporting cycle. ● Increased application uptime to 99.8% and reduced data-related errors by 40% by architecting a new ELT/ETL testing pipeline and implementing robust data validation logic. ● Streamlined the development lifecycle by creating high-fidelity Figma mockups and Draw.io workflow diagrams, improving design hand-offs, and reducing rework.	
IQTech Consultant, LLC	
Salesforce Administrator / Consultant (Contract)	Jan. 2021 – Oct. 2022
● Architected and deployed custom Salesforce solutions and applications for 3 enterprise clients, automating workflows and reducing manual data entry by 30%. ● Integrated Salesforce with React (JSforce/LDS) and resolved 90%+ of user issues within one business day, accelerating client adoption. ● Implemented an organizational security baseline with object and field-level controls to secure critical user information.	

EDUCATION

Flatiron School	Jun. 2020 – Apr. 2021
Full Stack Software Engineering Certification	
Touro College	Jan. 2000 – Jun. 2003
BS - Data Communications / Computer Science
